

# Our logo may be red but we're loving the color **green**

PrintXcel's Toledo Ohio facility has successfully completed an independent audit and is certified to sell SFI and FSC Chain of Custody Certified products! **What this means to you** is that you can now offer your customers environmentally conscious direct mail and promotional products from our Toledo facility.

Environmental improvement and conservation are integrated into all aspects of our business. We have active programs in place to:

- Minimize production waste
- Recycle used dies, plates and paper used in job set up
- Use biodegradable soy based inks
- Offer paperless electronic proofing methods
- Offer and encourage the use of environmentally sustainable (recyclable) or eco-certified (SFI or FSC Certified) materials

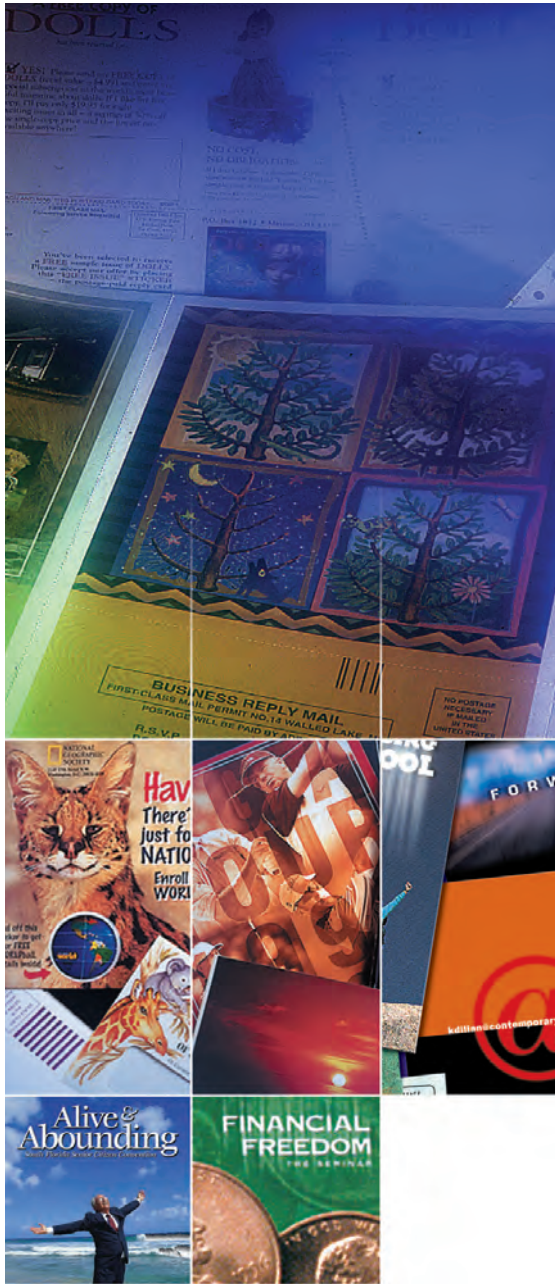

#### **What does SFI and FSC Chain of Custody Forestry Certification mean?**

Certification guarantees that the fiber used to produce paper has been harvested from a properly managed forest. Responsible paper procurement is currently the major concern for environmentally-friendly printing and PrintXcel is required to adhere to strict, widely accepted standards to obtain and maintain our certification. We support socially and environmentally responsible forest management and will continually search for additional eco-friendly methods of manufacturing and delivery of our products to market.

**For more information about availability please contact a Toledo Customer Service Representative today at (800) 537-8648**
